

# Fabrication Services Projects Quarter 1, 2019

Swagelok Alabama | Central & South Florida | West Tennessee

**If you're short on manpower, Swagelok can provide an extra set of hands by building your fluid system assemblies for you.**

You'll find no higher quality assemblies, panels or enclosures anywhere. We produce a professional, repeatable solution, with testing, inspection, and packaging – all with Swagelok's Limited Lifetime Warranty.

## Check out our recent projects:

### Mobile custom fabricated valve functionality verification test cart:

This collaboration with the customer allows them to verify valve system functionality. The custom operations designed in this portable test cart allow the customer to easily administer known test criteria more effectively and efficiently.

>>>

### Highly effective and cost-efficient replacement for exotic alloy components:

The exotic alloys required to handle the corrosive nature of the high chloride chemicals used in this water treatment application made the project budget unjustifiable. However, the chemical and environmental resistance of Swagelok PFA components got the project back on track in this custom instrument enclosure that uses an HC 276 manifold in combination with Swagelok PFA valves, fittings and tubing.
