

## Simple Assemblies

You've seen our high-quality assemblies, panels, and enclosures. Save time by relying on us for your less complex assemblies as well.

When the clock is ticking and you're under the gun, you can rely on the experts at Swagelok to be there every step of the way. We take care of the dirty work, and let you focus on growing your business.

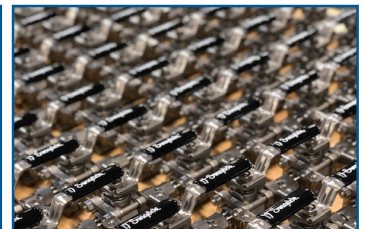

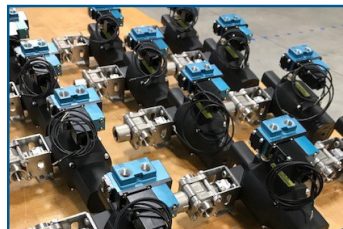

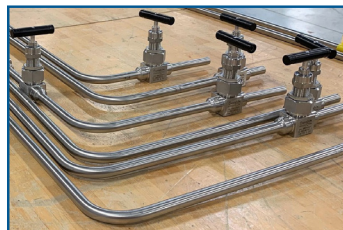

If you're short on manpower, Swagelok can provide an extra set of hands by building your fluid system assemblies for you. Reduce your planning, assembly and purchasing costs by taking advantage of our high-performing fabrication team.

- Save time by receiving simple assemblies that easily install into your work
- Increase capacity by freeing up your skilled labor to do what they do best
- Simple assemblies that include fittings, bends, welds, hoses, valves, and gauges
- On-site design and engineering support to your system
- Dedicated part numbers for easy ordering the first time and future orders
- Fast turn around time on quotes and orders
- Precision fabrication to allow for consistent installation in the shop or field
- Backed by Swagelok's Limited Lifetime Warranty

- Avoid costs of wasted material and labor from rework
- Reduce purchasing costs by buying one part number from one supplier

### How it works:

We'll discuss your specifications, design, budget, performance needs, and timetable. After that we provide a proposal detailing your request with a plan for a 3D CAD model drawing. Then we'll optimize the design, lay it out, assemble, test, certify, warranty, and deliver exactly what you're looking for. No prototyping, no waste and rework, no time crunch, no headache.
